Graded by	 ARNOLD Hajihil
Feedback comments	<p>—</p> <p>Well done on a thoughtful and well-researched essay! You have clearly demonstrated a strong understanding of how climate change is impacting wildlife across different ecosystems. Your explanations were clear and supported with relevant examples, such as habitat loss, species migration, and disruption of food chains. I especially appreciated your discussion on how even small shifts in climate can create significant ripple effects in the natural world.</p> <p>Your writing is structured well, with a clear introduction, body, and conclusion. The transitions between paragraphs made your arguments easy to follow, and your use of evidence shows your ability to critically engage with the topic. Keep up the good work—this is a strong piece that shows both knowledge and analytical thinking.</p> <p>Great job overall!</p>
